

Oracle Database 12c: Administration Workshop

ora12c220-ver2

Learning Resources Available From The Sideris Training Portal

5 Days

General Description

The overall objective of this textbook is threefold. First, this textbook instructs one in many of the day-to-day administration tasks required of an Oracle database administrator. Second, it is one of the textbook modules that assist in preparation for certification as an Oracle Certified Associated (OCA) database administrator. Finally, it introduces one to many of the administration sub-specialties that one might next pursue. It is increasingly rare for a single database administrator to fulfill all the required responsibilities necessary for management of an enterprise-scale Oracle database installation. Therefore, one may eventually specialize into backup and recovery strategies, database performance tuning, security administration and the like. So this textbook introduces the many powerful capabilities of the Oracle database and references the applicable textbooks within the Sideris Oracle database administration series that one might next consult.

Whenever appropriate this textbook demonstrates how an Oracle database installation integrates with its host environment, most commonly a Linux, Unix or MS Windows operating system platform. Extensive examples, workshop exercises and solutions are provided using the SQL command-line, the Enterprise Manager Database Express and the Enterprise Manager Cloud Control interfaces.

The target audience for this textbook is all Oracle professionals. Among the specific groups for whom this textbook will be helpful are:

Target Audience

- Database administrators
- Application designers and developers
- Web server administrators
- System administrators
- Implementation specialists
- Data center support engineers
- Chief Information Officers (CIO) and other information technology (IT) management professionals

These are mandatory prerequisites for this textbook:

Prerequisites

- Oracle Database 12c: SQL Fundamentals (Levels I & II)
- Oracle Database 12c: Install & Upgrade Workshop
- Oracle Database 12c: Architecture & Internals

Certification

This textbook considers subjects applicable to certification as an Oracle Database 12c Administrator Certified Associate (OCA) for "Exam: 1Z0-062: Oracle Database 12c: Installation And Administration".

Oracle Database 12c: Administration Workshop

ora12c220-ver2

Learning Resources Available From The Sideris Training Portal

5 Days

Content Summary

Volumes: 2
Pages: 970
Workshops: 13
Exercises: 94

When delivered as an instructor-led training (ILT) or live virtual training session, the suggested length of this textbook is 5 days.

Training Suggestions

This textbook includes minimal coverage of the architecture and internals of the Oracle 12c database such that it can be successfully used without the prerequisite ORACLE DATABASE 12C: ARCHITECTURE & INTERNALS. However, this not recommended and we suggest that this prerequisite either be met prior to using this textbook or that the prerequisite textbook is incorporated into a presentation along with this one that you are now reading. Further, it is not recommended that administrators begin management of a production database without having considered the in-depth architectural information found within that prerequisite textbook.

Contents

Introduction: Managing The Database Instance

- The Database Management Tools
- EM Database Express
- EM Cloud Control
- SQL Developer
- Database Administration Duties
- SYSOPER
- SYSDBA
- Database State & Stages
- Startup With EM Cloud Control
- Startup With SQL*PLUS
- Shutdown With EM Cloud Control
- Shutdown With SQL*PLUS
- Using MS Windows Services

Introduction: Database Architecture Review

- Database Instance Configurations
- Memory Structures
- Process Structures
- Storage Architecture

Introduction: Oracle Network Environment

- Oracle NET Services Architecture
- Oracle NET Configuration Assistant
- Oracle NET Manager
- Using EM Cloud Control
- Advanced Network Compression
- Troubleshooting Network Problems

Introduction: Starting & Stopping Database Services

- Start & Stop The Database Listener
- About Database Startup/Shutdown

Introduction: Diagnostics & Oracle Support

Oracle Database 12c: Administration Workshop

ora12c220-ver2

Learning Resources Available From The Sideris Training Portal

5 Days

- About Database Diagnostics
- Fault Diagnosability Infrastructure
- Database Instance Health Snapshot
- The Support Workbench
- Proactive Database Health Checks
- Package Diagnostic Data
- Working With The Knowledge Base

Storage: Tablespace Management

- Starter Tablespaces
- Create Tablespace With EM CC
- Create Tablespace With SQL
- Manage Tablespaces With EM CC
- Manage Tablespaces With EM DE
- Manage Tablespaces With SQL
- DROP Tablespace
- ALTER Tablespace

Storage: Advanced Tablespace Management

- Managing Temporary Tablespaces
- Temp Tablespace Groups With EM
- Temp Tablespace Groups With SQL
- Default Permanent Tablespaces
- Bigfile Tablespaces
- Managing The SYSAUX Tablespace

Storage: Data Files & Temp Files Management

- Manage Data Files With EM
- Access Metadata With SQL
- Manage Data Files With SQL
- Manage Temp Files
- Oracle-Managed Files (OMF)

Storage: Undo Data & Undo Tablespaces

- About Undo Space Management
- Configure Undo Management
- Guarantee Undo Retention

- Monitor Undo Space With SQL
- Use The EM Undo Advisor

Security & Schemas: Security Overview & Database Privileges

- Database Security Principles
- Database System Privileges
- Database Object Privileges
- Super Administrator Roles
- Privilege Analysis

Security & Schemas: User Security

- Create & Manage User Accounts
- Manage Users With EM
- Manage Users With SQL
- CREATE User
- ALTER User
- DROP User
- Grant & Revoke Privileges
- Resource Limits Via Profiles
- ALTER Profile
- DROP Profile
- Password Management Via Profiles
- Role-Based Security Management
- Alter User...Default Role
- Set Role
- Delegating Privilege Authorization
- With Admin Option & System Privileges
- With Grant Option & Object Privileges
- Principle Of Least Privilege Checklist

Security & Schemas: Database Auditing

- Auditing Database Activity
- Traditional Auditing
- Unified Auditing
- Create Audit Policy

Security & Schemas: SQL Loader

Oracle Database 12c: Administration Workshop

ora12c220-ver2

Learning Resources Available From The Sideris Training Portal

5 Days

- Loader Concepts
- Loader From The Command Line
- Control File Options
- Load Methods
- Loader Express Mode
- Loader From EM

Security & Schemas: Export & Import

- Manage Directory Objects
- The Data Pump Architecture
- Data Pump Export
- Data Pump Import
- Data Pump Dictionary Views
- Using The EM Cc Interface

Performance & Availability: Managing Performance & SQL Tuning

- Management Advisory Framework
- Performance Monitoring & AWR
- The SQL Tuning Advisor
- Monitoring Exceptions With Metrics

Performance & Availability: Data Concurrency

- About System & User Locks
- Monitor & Manage User Locks
- Monitor Locks With Data Dictionary
- Manage Locks With EM

Performance & Availability: Backup & Recovery Concepts

- Backup & Recovery Structures
- Managing Redo Data
- Configuring For Recoverability
- Instance Recovery
- Recoverability Checklist
